Portfolio

Professional Summary

Backend Developer focused on building scalable APIs, distributed systems, microservices, and cloud-native applications using Node.js, Express.js, FastAPI, MongoDB, Redis, RabbitMQ, and Docker. Experienced in full-stack development with strong interest in backend architecture and system design.

Education

Guru Ghasidas Vishwavidyalaya

Bachelor of Technology in Information Technology

Dec 2022 – May 2026

Bilaspur, Chhattisgarh

Relevant Coursework

- Data Structures & Algorithms
- Computer Networks
- Operating Systems
- Database Management Systems
- Machine Learning
- Object Oriented Programming
- Compiler Design
- Cloud & Edge Computing

Projects

SocialHive-Microservices: Microservices-based Social Media Platform

- Built a scalable microservices-based backend using Node.js, Express, MongoDB, Redis, Docker with modular architecture.
- Implemented Identity Service (JWT auth), Post Service (CRUD), Media Service (uploads), and Search Service.
- Designed API Gateway for seamless request routing; containerized services with Docker & Docker Compose.
- GitHub Repository

ImageVault – Secure Role-Based Image Management System

- Developed a secure image management system using Node.js, Express.js, MongoDB, Multer, Cloudinary, JWT Authentication, RBAC.
- Implemented authentication and role-based authorization—admins can upload/delete, users can view only.
- Integrated Multer for file uploads and Cloudinary for scalable cloud storage.
- GitHub Repository

UAV Edge Sim: Distributed Edge AI & Federated Learning Simulation Platform

- Engineered a distributed UAV edge computing simulation platform using Python, FastAPI, WebSockets, Docker, ONNX Runtime, and Flower Federated Learning.
- Built a real-time FastAPI backend controller with WebSocket telemetry streaming for live monitoring of UAV state, battery metrics, inference outputs, and camera feeds.
- Implemented distributed APIs for UAV registration, telemetry reporting, inference ingestion, and centralized fleet control.
- GitHub Repository

Skills

Programming & Problem Solving: Data Structures & Algorithms (C++)

Languages: JavaScript (ES6+), Python, C++, SQL

Frameworks & Libraries: Node.js, Express.js, FastAPI, React.js, NumPy, Pandas

Databases & Messaging: MongoDB, PostgreSQL, Redis, RabbitMQ

Cloud & Deployment: Docker, Docker Compose, Microservices

Developer Tools: Git/GitHub, VS Code, Postman

AI / Edge Systems: ONNX Runtime, PyTorch, Federated Learning

Achievements & Certifications

- Solved 120+ problems on LeetCode in Data Structures & Algorithms.
- Solved 45+ problems on GeeksforGeeks in Data Structures & Algorithms.
- Completed Udemy Web Development Bootcamp by Dr. Angela Yu
